

Cesar Garrido

Houston, TX | 832-651-3088 | [Email: CesarGarrido00@gmail.com](mailto:CesarGarrido00@gmail.com)

Cybersecurity student and former U.S. Marine Corps Infantry Team Leader with hands-on experience in SIEM-based threat detection, log analysis, and network defense. Proven ability to operate in mission-critical environments requiring secure communications, situational awareness, and rapid decision-making. Experienced with Splunk, Sysmon, Wireshark, and Microsoft Sentinel for threat monitoring and analysis. Strong interest in supporting cyber, communications, and enterprise IT operations in contested, mission-driven environments.

TECHNICAL SKILLS:

Tools

• Splunk, Sysmon, Wireshark, Nmap, Kali Linux, VMware, Python, Software Defined Radio (SDR)

Systems

• Windows, Linux, Windows Event Logs, Active Directory.

Concepts

• IDS/IDPS, Log Analysis, Incident Response, Vulnerability Analysis, Network Security, Secure Communications.

Professional Skills

• Bilingual (English/Spanish), Technical Documentation, Risk Management.

PROJECTS:

Spectrum Awareness for Cyber Operators: Why EMS matters in Cyber Defense

- Prototyped a spectrum-awareness workflow (Detect → Attribute → Mitigate) to restore mission capability in contested environments.
- Developed a cross-layer defensive framework to secure mission-critical RF systems against jamming and spoofing at OSI Layers 1-2.
- Demonstrated SDR-based threat detection and RF fingerprinting to mitigate physical-layer attacks.

Incident Response & Ransomware Analysis Lab

- Performed simulated ransomware incident response including detection, containment, and analysis.
- Analyzed system logs and security alerts to identify malicious activity.
- Documented findings aligned with incident response workflows.

Security Monitoring & IDS Lab

- Configured and monitored IDS to detect suspicious network activity.
- Investigated alerts and validated potential threats through log analysis.
- Documented security events impacting system availability.

Azure Honeypot

- Deployed a high interaction honeypot within an Azure environment to capture and analyze live RDP brute-force attacks.
- Configured Log Analytics Workspaces and Microsoft Sentinel (SIEM) to aggregate security logs and visualize global attack origins.
- Implemented Network Security Group (NSG) rules to control traffic flow and monitor unauthorized access attempts.

PROFESSIONAL EXPERIENCE:

Star Pallets, LLC, Houston, TX

Operations Supervisor

01/2021 to Present

- Direct daily operations and maintenance activities, supervising staff to ensure 100% compliance with federal, state, and safety regulations (DOT/OSHA).
- Manage work order systems and technical reporting while implementing improvements to SOPs and operating systems to enhance efficiency.
- Coordinate with customers on technical inquiries and provide staff training to maintain high service standards.

Marine Corps, San Diego, CA

Infantry Team Leader (Eligible for security clearance)

11/2016 to 11/2020

- Led and supervised teams in high-risk, mission-critical environments, executing operational directives and managing strategic planning.
- Implemented risk mitigation strategies and conducted specialized team training to ensure operational readiness in fast-paced settings.
- Facilitated clear communication and coordinated efforts across multi-functional teams to achieve leadership objectives.

EDUCATION & HONORS:

Houston Community College, Houston, TX

Will obtain Associate of Applied Science Degree in May 2026.

- Computer Systems Networking (Cybersecurity specialization).
- Related coursework: Network Security, Intrusion Detection Systems, Networking Fundamentals, Linux Operating Systems, Cybersecurity Fundamentals.
- GPA: 3.79.
- Dean's List: Houston Community College | October 2025.
- VICEROY Scholar: DoD-supported cybersecurity leadership program emphasizing hands-on training and mission-focused skills | November 2025.

National VICEROY Cyber Competition: Chapter 2 – Sentinel's Watch

• Competed as a member of Team Iron Cipher in a multi-day competition focused on mission-critical cyber defense.

National VICEROY Symposium Poster Finalist | Williamsburg, VA | April 2026

• Developed and presented research on **Spectrum Awareness for Cyber Operators: Why EMS matters in Cyber Defense** to DoD officials at the College of William & Mary.
